Section 1

Parking can be found at Bath road car park (SN15 2SA) Sadlers Mead Car Park (SN15 3QD) On sundays you can park on Monkton hill if you are early

Section 1 Fishable areas

Section 1
The deepest downstream section near the town, it's one of the club's best all-round stretches for mixed fishing.
What you can catch
Bream, Perch, Roach, Pike, CarpChub – mainly during the winter when the river carries more flow.

The water is generally **10–12 feet deep** with a slow, steady flow, making it ideal for feeder and float fishing.
Best methods
Roach & perch

- Fish a stick or waggler float if the river is steady.
- On deeper pegs, a small cage feeder works well.
- Baits: maggots, casters, worms and hemp.

Bream

- Method or open-end feeder.
- Feed little and often with groundbait and particles.
- Hook baits: double maggot, worm or sweetcorn.
- Best at dawn, dusk or after dark (where club rules allow fishing hours).

Pike (autumn and winter)

- Deadbaiting is the traditional approach.

- Remember that livebaiting is prohibited on Chippenham AC waters.

Winter chub

- Fish a link ledger or feeder close to cover.
- Bread, cheese paste, worms or luncheon meat are reliable winter baits.

- Remember that **livebaiting is prohibited** on Chippenham AC waters.

Winter chub

- Fish a link ledger or feeder close to cover.
- Bread, cheese paste, worms or luncheon meat are reliable winter baits.
